

K-Love is an awesome radio station, only encouraging and positive as is it's "motto". I am continually refreshed by K-Love and usually listen to this station exclusively. I have tired of other radio stations that are often negative with very few substantial or positive broadcasts...it can be very draining, but having the opportunity to listen to a station like K-Love IS encouraging. The service K-Love provides is crucial to a community. The ability to provide a positive and uplifting message and music is what our society is in desperate need of. Please do not take that opportunity away for many local FM translators. It would be a huge loss to thousands of people. Thank you.
